

WHATEVER YOU WANT TO CALL IT, YOU NEED TO SEE **NEW DURANAR®** COIL COATINGS.

**Duranar Coil Coatings. Unequaled performance. Continuous improvements.**

A new formulation brings improved hardness and improved coverage to the already unequaled Duranar Coil Coatings. Simply because after 40 years, the unequaled performance and reputation of Duranar Coil Coatings deserves to remain unequaled. Our new data sheet and warranty will give you a full picture of the improvements. Get yours by calling 1-800-258-6398. Or online at [www.ppgduranar.com](http://www.ppgduranar.com).

**PROVIDE SURFACES A PATINA FINISH** →

Patina Green from Birchwood Casey immediately produces a Verdi green patina finish on copper, brass and bronze surfaces, including roof shingles, fascia and window and door frames. The liquid is a mixture of several copper compounds similar to those formed through natural aging and oxidation in outdoor weather conditions. Bright green, mint green or muted tones are achievable with the solution.

← **FINISHES RESIST FADING**

Steelscape's Spectrascape finishes provide adhesion, flexibility and weather performance when applied over the company's Z-NAL and TruZinc substrates. The finishes are available in most colors and provide good chalking and fade resistance. On-site manufacturing means lower cost, ordering flexibility, on-time delivery and reduced risk.

**INSULATION SYSTEM PROTECTS AGAINST FALLS** ↑

The Energy Saver insulation system, part of Guardian Building Products Distribution Inc.'s GBP Silvercote business unit, now includes OSHA-compliant edge fall protection, so crews can safely insulate the roofs of pre-engineered metal buildings. Consisting of a network of white galvanized banding and support fabric, the Energy Saver FP System restrains and supports weights up to 400 pounds.

← **COATINGS IMPROVE ENERGY EFFICIENCY**

ULTRA-Cool metal-roof coating technology from BASF Corp. improves the energy efficiency of a home or building by reducing energy consumption for air conditioning, which decreases greenhouse-gas emissions and fossil-fuel consumption. Standard colors show a 38.3 percent reflectivity. Tests show a higher eco-efficiency rating compared to black asphalt, architectural composite shingles, coated metal, clay and concrete.

**TOOL FABRICATES METAL**

Authentic Tools' single station Versa-Bender fabricates metal and flashing on the job site and quickly adjusts to the desired bending depth. It bends metal in various directions, and a five-point adjustable handle allows a great deal of leverage. The rolling shaft does not stick, and extra roller bearings on the face plate keep the metal in place while bending.
